**Qualitative Disclosure** - As per Reserve Bank of India guidelines, all deposit-taking NBFCs irrespective of their asset size and non-deposit-taking NBFCs with an asset size of Rs.5,000.00 crore and above are required to maintain a liquidity coverage ratio (LCR) to ensure availability of adequate high-quality liquid assets (HQLA) to survive any acute liquidity stress scenario i.e. cash outflow increased to 115% and cash inflow decreased to 75%, lasting for 30 days. As per RBI guidelines, LCR has been calculated using the simple average of daily observations (over a period of 90 days).

Cash outflows under secured funding include contractual payments of the term loan, NCDs, and other debt obligations including interest payments. To compute inflow from fully performing exposures, the company considers collection from performing advances including interest due in the next 30 days. Other cash inflows include cash from non-collable fixed deposits, Certificates of deposits, and mutual fund investments maturing in the next 30 days on as-is basis. The LCR as of June 30, 2024, is 165.71%, which is above the regulatory requirement of 85%.

**Definitions:**

A “Significant counterparty” is defined as a single counterparty or group of connected or affiliated counterparties accounting in aggregate for more than 1% of the NBFCNDSI's, NBFC-Ds total liabilities and 10% for other non-deposit taking NBFCs.
